

MOLECULAR BIOLOGY TOOL ENZYMES & REAGENTS

Research-grade and GMP-grade enzymes, engineered for reproducible results.

BioExacta brings a full portfolio of tool enzymes, raw-material enzymes and reagents to the European market — for life-science research, nucleic-acid therapeutics, molecular diagnostics and synthetic biology, from single enzymes to ready-to-use master mixes and assembly kits, produced under a certified quality system and held in stock in Warsaw.

In stock in Warsaw — fast EU delivery

Free samples available

OEM & exclusive distribution welcome

290+

Catalog products across 10 product lines

EU stock

Held in Warsaw for fast European delivery

2-year

Typical shelf life on core products

GMP grade

GMP-grade raw-material enzymes and residual-detection kits available.

ISO 13485

Certified quality management system — end-to-end fermentation, purification & QC.

Product Portfolio

10 PRODUCT LINES

01

Polymerases

Taq · HiFi · Bst · phi29 & PCR mixes

34

02

Reverse Transcriptases

M-MLV & all-in-one cDNA mixes

8

03

Real-time PCR (qPCR)

SYBR & probe premixes, RT-qPCR

12

04

Restriction Enzymes

LightNing® endonuclease range

116

05

Modification & Cloning

Ligases, assembly & editing enzymes

42

06

RTU Instant Granules

Ready-to-use lyophilized reagents

16

07

Protein Research Series

Cell-free synthesis & tools

22

08

Nucleic Acid Electrophoresis

Ladders, dyes & loading buffers

12

09

In Vitro Transcription

mRNA synthesis & capping enzymes

24

10

ELISA Kits

Residue & process detection

5

Where customers start with BioExacta

A snapshot of representative products. Detailed datasheets, performance data and the complete price list are available on request.

LightNing®

Restriction Endonuclease Range

116 ENZYMES

- **Comprehensive range:** 116 restriction enzymes for cloning & screening.
- **Stringent QC:** tighter quality standards with residue detection kits.
- **GMP-grade options:** raw-material enzymes for regulated workflows.
- **Reliable digestion:** consistent activity, batch to batch.

BE09018S · BE09001SG

In Vitro Transcription — mRNA Toolbox

MRNA / IVT

- **High yield:** ≥150 µg RNA per 20 µL reaction with T7 RNA Polymerase.
- **Complete toolbox:** T7 pol, DNase I-ST, pyrophosphatase, RNase inhibitor & NTPs.
- **Broad templates:** efficient transcription from 100 bp to 9 kb, high integrity.
- **mRNA-ready & GMP:** N1-methyl-pseudo-UTP for low-immunogenicity mRNA; GMP-grade T7 RNA Polymerase available.

BE07010 – BE07012

Cell-Free Protein Synthesis Kits

PROTEIN EXPRESSION

- **In vitro expression:** synthesize protein directly from DNA/RNA — no cells, no cloning bottleneck.
- **ncAA-ready:** dedicated kit for site-specific non-canonical amino acids (pAcF, pAzF, Kcr).
- **Difficult targets:** expresses cytotoxic and hard-to-express proteins.
- **Three tiers:** Standard, Pro (insoluble) and Max (disulfide-rich).

Stock in Warsaw

Popular items held in our EU warehouse — ready to ship for fast delivery across Europe.

Free samples

Request complimentary samples to evaluate performance in your own workflow before you commit.

OEM & exclusive

OEM / private-label supply and exclusive distribution partnerships are open to discuss.

Would you like the full picture?

We would be glad to share complete datasheets, the full 290+ product catalog and a tailored quotation for the items relevant to your work — plus free samples where available.
