

BioExacta Enzymes

Company & Portfolio Overview

BioExacta

Enzyme portfolio · Product support

A clear European-manufacturing operating model

Our approach

European commercial access and support, backed by a specialized enzyme manufacturer.

Portfolio at a glance

291

Products

116

Restriction-enzyme SKUs

10

Product categories

34 Polymerases

8 Reverse
transcriptases

12 PCR / qPCR

116 Restriction
enzymes

42 Modification &
cloning

16 Instant granules

22 Protein research

12 Electrophoresis

24 In vitro
transcription

5 ELISA kits

A broad enzyme range for research workflows

291

products across 10
categories

Representative products

**Taq DNA
Polymerase**

BE01001S
1,000 U · PCR

M-MLV GIV RT

BE02007S
Reverse transcription

**T7 RNA
Polymerase**

BE09002S
IVT / mRNA

Collagenase I

BE07007M
1 g · Protein research

EcoRI

BE04034S
Restriction enzyme

1 Fast portfolio screening

A full product overview with catalogue number, pack size, concentration, storage and transport conditions.

2 Stock and lead time

Stock, dispatch point and lead time are confirmed by catalogue number and order.

3 Evaluation support

Product documentation and evaluation samples can be discussed for technical review.

Product documentation for evaluation

01

Product documents

Datasheets, SDS and CoA can be requested.

02

SKU specifications

Pack size, concentration, storage and transport details by catalogue number.

03

Technical review

Product selection and application questions can be discussed.

04

Evaluation samples

Availability and quantities are confirmed on request.

Product documentation

Product-specific information

Request documents for the catalogue numbers under review.

Documentation and technical support

Collagenase I, II and IV

1 Type I

BE07007S / BE07007M
Epithelial, liver, lung, adipose and adrenal tissue dissociation

2 Type II

BE07008S / BE07008M
Heart, thyroid, salivary gland, liver, bone and cartilage

3 Type IV

BE07009S / BE07009M
Low trypsin activity; suitable for islet-cell dissociation

Available pack sizes

100 mg and 1 g · Bulk formats by quotation and technical review

EU supply support

Product identification, stock status and dispatch point are confirmed by catalogue number.

Pack sizes, storage and transport conditions are confirmed per catalogue number.

Broader enzyme capabilities

34

Polymerases

PCR, high-fidelity amplification and isothermal workflows

8

Reverse transcription

Standalone enzymes and premix formats

12

PCR / qPCR

SYBR, probe and one-step RT-qPCR formats

42

Cloning & modification

Ligases, nucleases, assembly kits and CRISPR tools

22

Protein research

Proteases, PNGase F, collagenases and CFPS kits

24

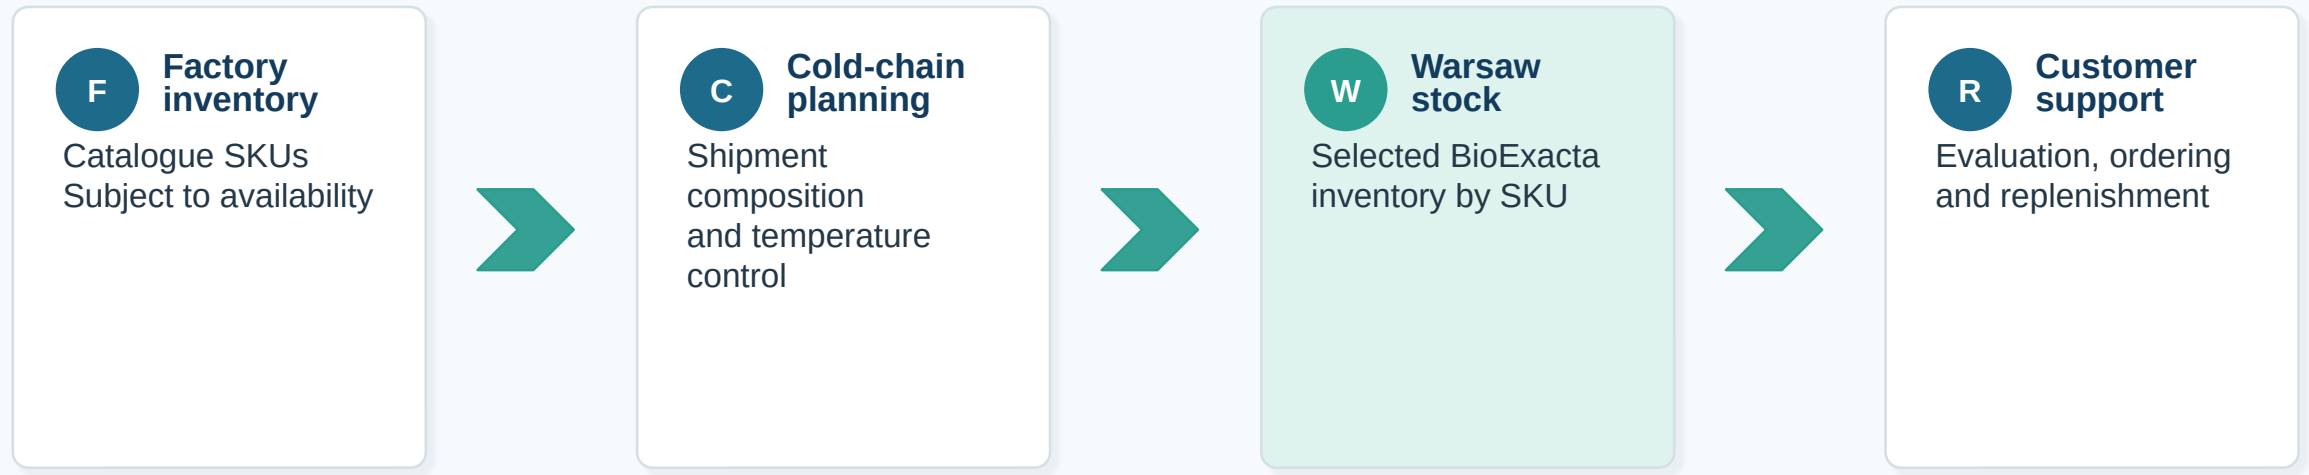

In vitro transcription

T7 polymerases, NTPs, inhibitors and processing enzymes

Plus instant granules, electrophoresis reagents and selected ELISA kits.

Supply routes and EU support

Operational principle

Selected BioExacta SKUs are held in Warsaw; other SKUs may be supplied from manufacturer inventory.

Stock status, dispatch point and lead time are confirmed by catalogue number and order.

Proposed evaluation pathway

Initial review package

Product portfolio · Datasheets, SDS and CoA on request · Evaluation samples subject to availability

Thank you

We look forward to supporting your enzyme-range evaluation.
